

Baja California Discovery: Exploring Mexico's Gulf of California

Journey deep into the Gulf of California to discover its hidden treasures. This encompassing expedition is the result of years of careful exploration by our veteran naturalists and features the best destinations this rich sea has to offer. It truly captures the exploratory spirit of our earliest days on the peninsula, more than 40 years ago, when Sven Lindblad first introduced intrepid travelers to its wild waters and desert shores.

Day by day

■ DAY 1

Loreto, Mexico / Embark Ship

Arrive in Loreto, a picturesque gulfside town dotted with Spanish colonial architecture. Transfer to the ship and set sail at sunset. Opt to arrive a day early on the One-Night Loreto Pre-Voyage Extension to explore historic Loreto and visit San Javier Mission in the Sierra de la Giganta.

Arrival Time: Arrive before 2:30 p.m. local time.
Arrival City: Loreto, Mexico

Meals included: dinner

◇ DAY 2

Bahía Concepción

Awake in Bahía Concepción, one of the largest bays of the Baja California peninsula, with over 50 miles of beaches. Take your coffee to the deck to witness the colorful landscapes revealed by the first of many gorgeous sunrises. This biodiversity hotspot is ripe for exploration. Board Zodiacs in search of whales and other marine life, kayak through lush mangrove systems and snorkel in turquoise waters. On land, join an invigorating hike among towering cacti or stroll the pristine beaches and learn about the ecology from your naturalists.

Meals included: breakfast, lunch, dinner

◇ DAY 3

Santa Rosalía / Cruising

After breakfast, disembark in Santa Rosalía, established as a French copper mining town in 1884. The French influence remains in the architecture—including a steel church designed by Gustave Eiffel—and the mining facilities have been left intact, with old locomotives and machinery visible throughout. Engage with the city's culture and cuisine as you walk the streets, stopping in at a world-famous French bakery for a sweet or savory treat. Back on board, take in the desert landscapes and search for a variety of whales as you cruise to your next destination.

Meals included: breakfast, lunch, dinner

◇ DAY 4

Bahía de los Ángeles

Get active this morning with options to hike, kayak, swim, snorkel or beachcomb within the Bahía de los Ángeles Biosphere Reserve. Board Zodiacs to seek out this protected reserve's diverse marine population, including endangered species such as fin whales, California sea lions and five species of sea turtles. Whale sharks have also historically been known to populate these waters. Later, enjoy a rare opportunity to see one of the strangest plants on earth, the Boojum tree. Sacred to indigenous people, and believed to have supernatural powers, this evolutionary oddity takes its name from a Lewis Carroll poem. Capture the experience with help from your Certified Photography Instructor.

Meals included: breakfast, lunch, dinner

◇ DAYS 5-7

Exploring the Midriff Islands / Bahía Loreto Marine Park

The islands of the Midriff region in the northern Gulf of California are favorites among naturalists for their remoteness as well as their exceptional wildlife and birdlife. With nature as your guide, you will actively explore these areas by Zodiac, kayak, paddleboard, snorkeling and hiking. Some of the locations you may visit include:

Isla San Pedro Mártir

This 1,000-foot-high, guano-covered island is home to the world's largest nesting colonies of blue-footed and brown boobies. The surrounding waters boast 14 species of marine mammals, including fin whales, Bryde's whales and a resident group of sperm whales.

Isla San Esteban

Featuring volcanic slopes and cliffs, Isla San Esteban is home to spiny-tailed iguana and chuckwallas, cohabitant lizards with fascinating evolutionary traits. As you hike the broad arroyo, keep an eye out for the spiny-tailed iguana feeding on flowers atop cardon cacti, while the chuckwalla dines on the leaves and fruits of low-lying plants.

Isla Rasa

This legendary uninhabited island is less than 0.21 square miles wide and yet is crucial to the survival of two species of seabirds. Historically 95% of the world's Heermann's gulls and elegant terns use the island as their nesting grounds, creating a cacophonous avian spectacle seen nowhere else on earth.

Bahía Loreto Marine Park

One of Mexico's natural treasures, this protected area offers a variety of pristine landscapes and a plethora of marine life. Search for bottlenose and common dolphins, with the possibility of encountering blue or sperm whales.

Meals included: breakfast, lunch, dinner

◇ DAYS 8-10

Exploring Southern Gulf Islands

Venture south to discover the gems of the southern Gulf. These islands and surrounding waters are celebrated for their conservation stories, marine life and the many thrilling experiences on offer. Some of the locations you may visit or enjoy by Zodiac include:

Cabo Pulmo National Marine Park

Set out to snorkel the pristine reefs of Cabo Pulmo National Marine Park, one of the most successful national marine parks in the world. Chat with locals about their advocacy to protect this unique place, including a cessation of fishing to protect the reef.

Isla Espíritu Santo

A national park as well as UNESCO World Heritage Site with volcanic rock formations, scenic beaches and coral reefs. This magical island offers excellent hiking opportunities and crystal-clear waters for snorkeling. It's a popular destination for researchers monitoring sea turtles.

Los Islotes

Located at the northern tip of the UNESCO Biosphere Reserve, Los Islotes is largely inaccessible to people and home to a large colony of sea lions. Conditions permitting, anchor off the rocky island where you'll don flippers, a mask and snorkel (which are provided) to swim with these curious inhabitants.

Isla San Jose

One of the larger islands in the Gulf of California, San José offers several landing possibilities depending on conditions and the whim of the moment. Photograph the ochre cliffs of the island's eastern shore, hike an enchanted, cactus-laden arroyo, or visit the abandoned salt works to the west. Discover rare wildlife among desert islands.

Meals included: breakfast, lunch, dinner

■ DAY 11

La Paz / Disembark Ship / San José del Cabo

Disembark in La Paz after breakfast and transfer to Los Cabos airport for flights home. You may opt for a post-voyage extension exploring the region's

culture and cuisine .

Departure Time: After 2:00 p.m., local time
Departure City: San José del Cabo, Mexico

Meals included: breakfast

National Geographic Venture

The *National Geographic Venture* is a state-of-the-art expedition ship ideal for discovering remote locations in domestic waters.

Following the build of *National Geographic Quest* at Nichols Brothers shipyard, her sister ship, *National Geographic Venture*, floated into the bay on Whidbey Island, Washington, becoming the 4th ship in the Lindblad fleet built at this storied shipyard. In the 1970s, Nichols Brothers built the twin ships *National Geographic Sea Bird* and *National Geographic Sea Lion*, which continue to sail the waters of the west coast of North America and Central America.

National Geographic Venture, like much of the wildlife she follows, is migratory. She follows the seasons from Alaska, along the coast of British Columbia, up the Columbia and Snake Rivers and along the Baja California coast. In each region, her design innovations were informed by 50+ years of expedition expertise to ensure extraordinary discoveries. *National Geographic Venture*'s shallow draft enables her to provide intimate 'insider' experiences of the charismatic regions we explore.

Like her sister ship *National Geographic Quest*, *National Geographic Venture* has dual boarding platforms. Enabling our team to load two Zodiacs at once means guests get off ship quickly to take advantage of wildlife sightings and maximize exploring time. Modern and clean-lined, with large expanses of glass to keep you connected to the extraordinary views, *National Geographic Venture* enables you to see, do and experience the best of her geographies.

Self-Disinfecting Ships

ACT Clean Coat™ is a light-activated, self-disinfecting cleaning process that continuously breaks down viruses, bacteria, mold, and airborne allergens across all ship surfaces. Not only does this create a cleaner, healthier shipboard environment for guests and crew alike, but this non-toxic, chemical-free system also saves more than one million gallons of water each year in our cleaning procedures, and reduces our carbon footprint as well as the amount of plastic and waste in our supply chain.

National Geographic Quest

GUESTS	CABINS
100	50

National Geographic Quest, built in 2017, is designed for sailing into fast-moving channels and shallow coves in pan-American waters.

When she rolled out of Nichols Brothers shipyard and into the bay on Whidbey Island, the 100 guest National Geographic Quest became the third ship in the Lindblad fleet built at this storied Pacific Northwest shipyard. In the 1970s, Nichols Brothers built the twin ships *National Geographic Sea Bird* and *National Geographic Sea Lion*, which continue to sail the waters of the west coast of North America and Central America.

National Geographic Quest was purpose-built to explore the fast-moving channels and narrow straits of Alaska, along the coast of Costa Rica and into the gray whale nursery lagoons of Baja, her design and engineering informed by our nearly 40 years of experience in these regions. Her twin boarding platforms, for example, were suggested by a veteran staffer. Enabling our team to load two Zodiacs at once means guests get off the ship quickly to take advantage of wildlife sightings and maximize exploring time.

National Geographic Quest's shallow draft allows her captain to navigate the same inner reaches and provide intimate "insider" experiences in these charismatic regions. Modern, clean-lined, with large expanses of glass to keep you connected to the extraordinary views, *National Geographic Quest* enables you to see, do and experience the best of her geographies.
